

**1st International Conference
for the follow-up of the Framework
Convention on Civil Defence Assistance**
Geneva, 03 October 2002

INTERNATIONAL DIRECTORY OF MEANS OF ASSISTANCE IN CIVIL DEFENCE

Under the title of the Framework Convention on Civil Defence Assistance, the International Civil Defence Organisation wishes, on the occasion of its first follow-up conference, to launch the compilation of an international directory of means of assistance within civil defence.

This task, which complements "The International Directory for Civil Protection, Defence, Safety and Emergency Management" created in 1999 by ICDO, will draw up an inventory of the means of assistance which the states are in a position to put forward, in the case of a demand for international assistance.

Established by means of a questionnaire, which has been informed by the states, this document aims to be a useful source of information for all international organs charged with operations of protection of populations, through which it will be widely diffused.

A reflection of capacities for mutual assistance, this tool will be one of the instruments of application by the convention concerning assistance, and in the development of international collaboration over the matter of assistance.
